HEATING 

The ideal temperature.
As always.

Choosing the right heating with Zodiac®

Dreaming of water at 28°C... Of course, heating your pool means enjoying water at the ideal temperature, even when the sun is playing hide-and-seek. But it also means bathing for longer, from the first signs of nice weather right up until the end of the season. A dream you can easily and confidently turn into reality with Zodiac® solutions.

Are you looking for simplicity and efficiency?

THE RIGHT CHOICE Zodiac® electric heaters

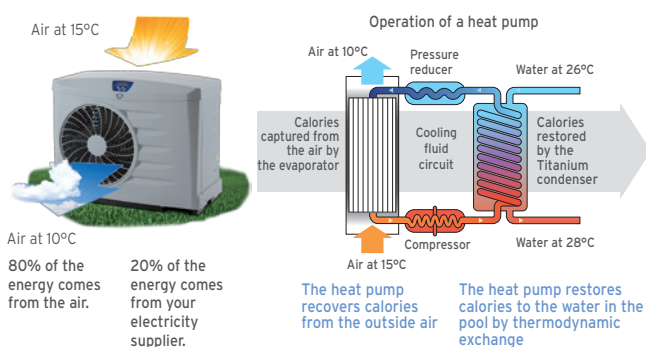

Easy to install and to use, Zodiac® electric heaters heat your pool rapidly at a very competitive purchase price. Compact, stand-alone units, they are fitted to the filtration system and you only have to start filtration to raise the temperature (in 2 to 5 days for water at 28°C, depending on the starting temperature).

Are you looking for performance and economy in use?

THE RIGHT CHOICE Zodiac® heat pumps

Ideal for all sizes of in-ground pools, Zodiac® heat pumps are an ecological, easy-to-install solution, also offering the most competitive running cost. By capturing calories in the outside air and transferring them into the water in your pool, they let you enjoy water at an ideal temperature for as long as you want, for modest energy consumption.

Does your house have a boiler, heat pump or geothermal heating?

THE RIGHT CHOICE Zodiac® heat pumps

Installed close to your boiler, Zodiac® heat exchangers use the heating circuit in your house to heat the water in your swimming pool. Financially very beneficial, they are also very efficient and increase the temperature rapidly (1 to 2 days), ideal for a holiday home, for example.

ZODIAC® HEAT PUMPS THE MOST COMPLETE RANGE ON THE MARKET

Z600

Manufactured in Germany, the Z600 range is the last word in heat pumps. Its performance, sturdy construction and silent operation are unequalled on the market.

Available in 5 models from 12.4 to 34.7 kW, covering pool volumes up to 130 m³.

ZS500

with patented Heatselect® technology

The first heat pump with a choice of 3 heating modes: EcoSilence, Smart or Boost, for optimised management of your heating and electricity consumption.

Available in 1 model from 5.8 to 11.4 kW (based on mode) for pool volumes up to 80 m³.

Z300

Efficient, reliable and quiet, the Z300 range is the only one on the market meeting the NF standard and, with 8 models from 6 to 15 kW, it covers all pool sizes, up to the most spacious.

Available in 8 models from 7.7 to 15.7 kW, covering pool volumes up to 110 m³ (including 4 'All Year' models).

Z200

Ultra-compact and discreet, it fits perfectly into small gardens.

Available in 4 power models from 5 to 11 kW, covering pool volumes up to 70 m³.

EasyConnect

The 'plug and play' connection kit makes installing your heat pump child's play, without the need for work or tools (compatible with the Z200 model).

Thermal audit

To identify your heating needs clearly and to optimise this investment, a thermal audit can be carried out to determine:

- the power needed to heat your swimming pool,
- the appropriate equipment that should be installed for your pool,
- operating costs,
- temperature increase time.

IF IN DOUBT, DON'T HESITATE TO ASK YOUR ZODIAC® DEALER FOR ADVICE.

WORTH KNOWING

In a swimming pool, **94% of the temperature** is lost from the surface of the pool. To keep water at an ideal temperature, it is therefore essential to install a suitable cover system.

ZODIAC®, THE RANGE

Zodiac® also designs and manufactures a complete range of electric heaters and heat exchangers.
